Abstract (en)  
The freezer has an interior for receiving products to be refrigerated and/or frozen. A thermoacoustic cooler (10) is partially arranged in the interior. A thermal insulator is arranged between the interior and an environment of the freezer, where a part of the cooler is arranged in the thermal insulation. A set of lines (25-28) for guiding cold heat transfer medium is arranged within the interior and are connected with cold heat exchangers (23, 24). Another set of lines (33-35) for guiding hot heat transfer medium is arranged outside the interior.
