Abstract (en)

[origin: WO2009003801A2] The invention relates to a dishwashing machine (1) having at least one conveying unit for conveying washing detergent, wherein the conveying unit has at least one pump with a brushless permanent magnet motor. The conveying unit has a first pump (5) and a second pump (6), each with a brushless permanent magnet motor, particularly a brushless direct current motor (Brushless DC, BLDC), and a shared controller electronic device (7) is provided for the first and the second pump of the conveying unit. The invention also relates to a controller electronic device (7) and a pump (5, 6; 30).
