Abstract (en)
[origin: WO2008145964A1] This invention relates to container containing a dose of a liquid cleaning composition for use in a ware washing machine, wherein said container is adapted to be disposed in a ware washing machine in a predetermined orientation and wherein said container comprises a low-level opening for permitting egress of the cleaning composition from the container (when disposed in said predetermined orientation), and wherein the container is of a water-insoluble plastics material and wherein the low-level opening is closed by water-soluble plastics closure member. The dosage element and chamber are particularly useful in the context of forming part of a multi-dosing cleaning composition delivery device and/or a refill for such a device.
