Abstract (en)
[origin: WO2009004635A2] A system for affecting a temperature of a patient, the system includes: a nose catheter that is adapted to be inserted into a nose upper channel and to receive a first fluid; and a temperature control and fluid supply unit that is adapted to supply the first fluid and control a temperature of the first fluid so as to affect a temperature of a brain of a patient when the nose catheter is inserted into the nose upper channel of a patient and receives the first fluid.
