Abstract (en)
[origin: WO2008141837A2] The invention relates to a device for a vibrator (2), comprising t least one resilient element (26, 28), with a force/travel curve having a first region, at least approximately given by an equation of formula $K = a + b \cdot W$, where K is the spring force of the at least one resilient element (26, 28), W is the spring travel and a and b are numbers greater than zero and a vibrator comprising such a device.
