Abstract (en)
[origin: WO2009003539A1] Implement for writing, marking and/or painting with a liquid, the implement having the following: a main store and a working store which can each accommodate a stock of free liquid, a sealing arrangement which has a sealing seat and a sealing body which is pressed under spring prestress in a sealing manner against a sealing seat and can be moved out of its sealing position away from the working store in the axial direction under the action of an inertial force in order to produce a connection between the main store and working store, and an applicator which is connected to the working store in order to discharge liquid, characterized in that the applicator is connected to the working store and is held in a positionally fixed manner relative to the sealing arrangement, and an end cup is provided, the end cup having a buffer and, in its base, having a nozzle through which the applicator is guided without play.
