Abstract (en)

[origin: WO2009004256A1] The invention concerns an internal lining for an automobile vehicle door, comprising two rigid casings (22, 23) between which is placed an internal reinforcement (24) which is secured to the two casings (22, 23). As per the invention, the reinforcement (24) comprises a hollow (40) extending from a first casing (22, 23) towards the second casing (22, 23) and enabling a heat source to weld the reinforcement (24) to the second casing (22, 23), by acting through an aperture (35) made in the first casing (22, 23). The invention has uses in the sector of internal linings for automobile vehicle doors.
