Abstract (en)

[origin: EP2009350A1] The flashlight has a light source (L) containing a light emitting diode (1) and a circuit which controls light source. The circuit has a feed supply (2), a current converter (W) and flash control device (B), which are connected in series. The current converter has a control unit (4), an inductor (6), an induction stop (7) and a resistor (8) which are connected in series. The flash control device has a switch (10) for actuating the light source and a microprocessor (9) for controlling the switch.
