Abstract (en)

[origin: WO2009000446A1] A label, particularly for textile goods, is provided with a support comprising plastic film for a metal antenna (4), an RFID chip (3) which can be put onto a textile label or onto a tissue or knitted fabric (10). The transponder is in the form of a flexible label transponder (1; 1a; 1b; 1c; 1d) and comprises at least one film (2; 12, 13; 12a, 13a). It is chemically or mechanically pre-treated in predefined connection areas (6a, 6b; 14; 18) and can be connected with a form fit and/or by a material-to-material bond to the tissue/knitted fabric of the textile goods (10; 10b; 10c; 10d), wherein preliminary fixing and chronologically independent final fixing of the label transponder takes place on the tissue or on the textile product.
