Abstract (en)

[origin: WO2008148481A1] The invention relates to an integrated capacitive sensor circuit, having a capacitive sensor (24) formed in an upper metallization layer (22) of the integrated capacitive sensor circuit, having at least two electrodes (22a, 22b) disposed in the upper metallization layer, and an electronic analysis circuit (14) coupled to the capacitive sensor (24) for determining a change in capacity of the capacitive sensor (24), wherein the capacitive sensor (24) and the analysis circuit (14) are mutually integrated on a semiconductor substrate (12).
