Abstract (en)
[origin: EP2163357A1] The auxiliary handle (11) has a grasping element (31) for holding the auxiliary handle, and has a bracing element for bracing and loosening a clamping section (21), which is arranged at an end of a bearing pin. The auxiliary handle has a releasing device with an actuating element. The releasing device is independent of the bracing element. The locking device is displaced from a blocking position for blocking the swivel joint into a release position for releasing the swivel joint by the actuation of the actuating element.
