Abstract (en)

[origin: EP2163359A1] The handle (11) has a handle element (31) for holding the auxiliary handle, which comprises bearing sections (34, 39). A blockable pivot joint (46) is arranged between a fixing section (21) and the handle element and comprises a pivot axis (12). A locking device (51) blocks and releases the pivot joint, and comprises a locking element (52) pivoted around an axle (53), which is aligned parallel to the pivot axis. The locking element is pivoted from a blocking position for blocking the pivot joint into a releasing position for releasing the pivot joint.
