Abstract (en)

Air conditioning unit (39) for a drum-type washer-dryer (1), in which a heat exchange area of an air passage (393) from a suction inlet port (391) to a suction outlet port (392) is partitioned between a suction-inlet-side heat exchange area and a suction-outlet-side heat exchange area, and a heat exchanger (395) comprising an evaporator (31) and a condenser (32) disposed in the partitioned areas inside a unit case (38) having the suction inlet port (391) and the suction outlet port (392), wherein the water generated in the heat exchange area is discharged to a bottom portion of the heat exchange area through a drainage passage provided with a projection or a narrowed portion as obstruction portions for catching a foreign matter such as lint so as not to flow onward.
