Abstract (en)
A compact lighting equipment, especially used for illuminating large commercial and/or industrial areas, comprising a structure, made of rolled and painted steel, which is suspended from ceiling by means of steel cables and proper fastening brackets (15) present between the structure and cables; according to the invention, the structure includes at least two bodies (10, 11), joined together by a hinge system (16), which allows, in a closed position of the equipment, to obtain a product length substantially equal to half the length of the products currently on the market.
