Abstract (en)

[origin: EP2164138A2] The connector has a contact holder in which a contact partner (6) is arranged. The contact partner has a contact ring (7) and contact tab (8), which emanates in a cable outlet region of the connector. The contact ring is provided on a plug side of the connector. The contact tab is arranged in a contact chamber of the contact holder and comprises an embossment (10), which corresponds with an undercut of the contact chamber. The embossment is provided between the contact ring and a cable connection region (12).
