Abstract (en)
[origin: WO2009000979A1] The invention relates to a toilet device including a box assembled from a carton pre-cut blank and a collection bag for urine and faeces, wherein the device includes: (i) a box defining by folding and connection, an opening (2) formed on the plate (1) thereof and used as a seat, at least two double side walls formed by the connection of angularly spaced panels (12/10a and 12a/10), and a double wall at the bottom formed by connecting the panels (20, 20a); and (ii) a gas- and liquid-tight collection bag, particularly made of a plastic material, having a peripheral upper portion entirely covering the panel (1) used as a seat and having a bottom that contains a gelling agent and extends into said opening (2), wherein during use the bag is attached to said box by V-shaped (70, 71) and half-V-shaped (70a, 71a) notches. The invention also relates to said blank as a product and to the use of the device for removing mephitic odours.
