Abstract (en)
[origin: WO2009004514A1] A novel ball-striking implement, in particular tennis, squash or badminton racquet, is described, with a head frame (1; 13) which comprises an impact surface, and with a stem which is integrally formed thereon and has a handle, wherein the impact surface is determined by at least one string (3; 19) which is stretched crosswise and which forms string sections fastened to the head frame substantially parallel to one another. The string sections are guided in holding elements (2; 15) on the inside of the head frame in such a manner that the string sections lie in a single plane forming the striking surface.
