Abstract (en)
[origin: WO2009001242A1] A pulley for multi-wire machine tools comprising a disk-shaped body (2) with a substantially central rotation axis (X) and an outer peripheral portion (3), an anti-wear protection (4) associated with the outer peripheral region (3) of said disk-shaped body (2) and having an annular shape with at least one outer peripheral groove (5) for receiving at least one flexible element. The anti-wear protection (4) has an annular appendix (6), extending radially inwards at the side opposite the at least one groove (5), the disk-shaped body (2) having at the outer peripheral region (3) an annular channel (8) so shaped to receive and firmly hold the annular appendix (6) of the anti-wear protection (6).
