Abstract (en)
[origin: WO2008153954A1] The present invention includes a package for holding one or more comestible products having a first compartment and a second compartment extending from, and rotatable with respect to, the first compartment. The package has a closed position where the first and second compartments are substantially coplanar with each other and an open position wherein the second compartment lies in an adjacent overlapping tiered relation to the first compartment. A cover extends from the second compartment and overlies at least a portion of the first and second compartments when the package is in the closed position.
