Abstract (en)
[origin: WO2009007165A1] A charge-air hose 2 according to the invention for connecting to a pipe stub 4 is, in the assembled position, pushed into the pipe stub 4 in such a way that excess pressure occurring in the charge-air hose 2 presses the charge-air hose 2 radially outward against the radial inner wall 6 of the pipe stub 4. According to the invention, the charge-air hose 2 is assigned latching means which, during the insertion of the charge-air hose 2 into the pipe stub 4, latch with the pipe stub 4 so as to axially fix the charge-air hose 2 to the pipe stub 4 in a predetermined axial position of the charge-air hose 2 relative to the pipe stub 4.
