Abstract (en)
[origin: WO2008150238A1] The invention regards a system and a method providing a direct secure information channel between users peer to peer through a dedicated information exchange server (16) for that purpose. The receiver of the information is provided a code (26) to its cellular phone (22), and replying to the information exchange server (16) with the code (26) through a web-browser VPN plug-in (14), if the information is accepted.
