Abstract (en)

The invention concerns a small single-seater aquatic pedal boat, having at least one small front paddlewheel, and the special feature that it folds along a axis tranverse to the craft, halving the length thereof, so that it is easily transported by the user as if it were a suitcase with wheels, by means of a handle or handles and some lower wheels positioned laterally and/or in the keels of the floats. The pedal boat also has a backrest which is inclinably adjustable, pedals which are movable to suit the user, and for storing items side chests whose lids serve as armrests for the passenger. The pedal boat is made almost completely of plastic materials and the main advantage thereof is that it can be folded or unfolded in a few seconds, transforming securely into the relevant position and ready for use as a watercraft, for movement on land or transport in a vehicle or trailer, or for storage thereof.
