Abstract (en)
[origin: EP2166175A1] The tile (1) has lateral edges (6, 7) cooperating with an adjusting tile by interlocking, where the tiles are made of terracotta. Positioning studs (14, 15) of one of the edges and positioning studs (16, 17) of another edge are laterally projected towards exterior. The studs of the former edge are placed opposite to the studs of the latter edge during assembling of the tiles. The studs of the tile are supported against studs of the adjacent tile. The distance between free ends of the studs corresponds to a predetermined distance. An independent claim is also included for a method for fabricating a rectangular interlocking roofing tile.
