Abstract (en)
[origin: EP2166191A2] The system (1) has a curtain element (3) held by a holding device (2) that comprises a holding projection (5) provided at a carrier rail (4) i.e. L-profile. A recess (6) is provided in an end region of the curtain element, and the holding projection is interpositioned in the recess in an assembly condition of the system. The holding device has a frontal mountable and/or pivotable securing element (7) that overlaps a free end of the holding projection in a securing position. The securing element is pivotally provided at a horizontal edge (8) of the carrier rail.
