Abstract (en)  
[origin: EP2166299A2] The arrangement has an air dryer provided with an air supply pipe and an air discharge pipe in an air guidance system. A radiation dryer has another air guidance system provided with a suction- and/or air circulation channel (30) and another air discharge pipe that is connected to the suction- and/or air circulation channel. The latter air discharge pipe is connected with the former air supply pipe of the former air guidance system of the air dryer. The suction- and/or air circulation channel of the radiation dryer is completely surrounded with a thermal insulation (35).
