Abstract (en)  
[origin: US2009157461A1] A vehicle deployment planning method and system are provided for planning a convoy that travels on at least one roadway using a convoy planning tool. The tool includes a computer processor, data storage, and machine language instructions that enable the tool to perform the following tasks. The tool finds one or more available vehicles for the convoy. The tool displays the one or more available vehicles in a vehicle corral. The user of the tool selects one or more vehicles from the vehicle corral. The user places the selected one or more vehicles in a position in the convoy. The tool displays the placed one or more vehicles in the convoy. The tool determines a convoy configuration is complete and then displays the complete convoy configuration.
