Abstract (en)

The present invention relates to grounding devices, in particular to a grounding device (1) at least consisting of a solid ground wire (2), a contact member (4) at one end of the solid ground wire (2), and a lug (5) at the other end of the solid ground wire (2). The contact member (4) is for connecting the grounding device (1) to an external metal structure to be grounded and the lug (5) is for connecting the grounding device (1) to ground. The lug (5) is formed as a through hole along the diameter of the solid ground wire (2).
