Abstract (en)
[origin: WO2008155226A1] Packaging (1) for infusing an infusible substance, comprising two filter layers (2) in such a way as to define a volume (3) in which the infusible substance is received, and an impermeable envelope (4) designed to cover the two filter layers (2), said packaging being characterized in that the envelope (4) is attached to the filter layers (2) and in that the envelope (4) is degradable. The invention is applicable to the packaging of ground coffee or tea usable with machines using servings of ground coffee or prepackaged tea.
