Abstract (en)

[origin: WO2009013387A1] The object of the invention is a car sling of an elevator and an arrangement for fitting an elevator car into the car sling, which car sling (1) comprises at least vertical supports (2) as well as essentially horizontal upper supports (9). The upper supports (9) comprise at least fixing parts (10) and adjustment parts (11) fixed to the fixing parts (10). The length of the upper supports (9) is arranged to be adjusted by changing the position of the adjustment part (11) in relation to the fixing part (10).
