Abstract (en)
[origin: WO2008148202A1] The present application is directed to i) a two-step method for synthesizing phosphme-ammophosphme (P,N,P) ligands, ii) the use of such ligands in the preparation of metal complexes as hydrogenation catalysts, and iii) ammophosphme (P,N) and phosphme-ammophosphme (P,N,P) ligands of various structures In particular, the two-step method in i) involves reacting a protected tertiary amine of formula (I) with a metal phosphide of the formula Y-PR₈R₉ to afford an ammophosphme of formula (II), which is then reacted with a phosphme of formula (III) to afford the phosphme-ammophosphme of formula (IV).
