Abstract (en)
[origin: WO2009013208A1] The invention relates to the use of carboxylic acid diesters, in particular for treating material, and more particularly for cleaning paint stains on textile fibres in order to improve the cleaning performance. According to the invention, the formulation comprises at least one dicarboxylic acid diester of formula (I) R1-OOC-A-COO-R2 in which the groups R1 and R2 are the same or different and represent a linear or branched, cyclic or non-cyclic C1-C20 alkyl, aryl, alkyaryl, or arylalkyl group; the group A represents a linear or branched divalent alkylene group; and at least one non-ionic polyalcoxylated terpene surfactant.
