Abstract (en)

[origin: WO2009000695A1] The invention relates to a method for transmitting information from a first identifying object (ID1) for a motor vehicle to a second identifying object (ID2), the said method comprising the steps of: activating a synchronization mode (MODSYNC); opening a two-way communication session; and transmitting information from one identifying object (ID1) to another identifying object (ID2) according to a date associated with the information to be transmitted. Application: motor vehicle.
