Abstract (en)
[origin: WO2009010255A1] The invention relates to a compact, substantially eye-safe lighting module (1) comprising an electric power source (2), a voltage transformer (3) and a radiation source for electromagnetic radiation (4), and an output limiter (5) for adjusting the emitted electromagnetic radiation. The invention further relates to a pocket tool, especially pocket knife (26) or flat tool card (31), comprising a lighting module (32) for emitting electromagnetic radiation, which is arranged inside the housing (27) and which can be operated by means of an actuation element (30). The lighting module (32) is adapted to emit a monochromatic electromagnetic radiation that is limited with respect to its radiant power.
