Abstract (en)

[origin: EP2168457A2] The guide (1) has a guide rail (2) fastened to a side wall of a furniture body. A running rail (3) is coupled with a pull-out furniture section and mounted on the guide rail. The running rail is vertically supported in a front end region of the guide rail by a support device (4). The running rail is horizontally guided within a displacement region relative to the guide rail by a guide device (5) i.e. ball cage. The guide device is arranged on the running rail and is displaceable in relation to the running rail. The support device together with rollers or sliding pieces forms a mounting unit.
