Abstract (en)

[origin: EP2168732A2] The machine has a printing element for printing a printing substrate web. A cutting device cuts the printing substrate web into partial webs. A correction device (1) for partial web side register correction and/or register correction and/or side position correction of one of the partial webs or a partial web bundle is arranged along a rotation direction of the printing substrate web according to the cutting device. The cutting device exhibits a cutter, which is stationarily installed or transversely adjusted to the rotation direction of the printing substrate web by a drive.
