Abstract (en)

[origin: EP2168874A1] The device (1) has conveying elements (5a, 5b) provided with a product receiver (6a) e.g. cup. The conveying elements are movable between a position for receiving products from a storage container and another position for delivering products to a placing device (11). The placing device transfers the products into a packing container, and the elements are movable back and forth opposite to each other. Transport devices (3a, 3b, 4a, 4b) are arranged parallel to the conveying element in a freely transportable manner.
