Abstract (en)
Cooling appliance with a structure comprising a packing device (2) suitable for vacuum packing products contained in flexible bags. Said packing device (2) comprises packing means (3) that comprise a vacuum chamber in which is disposed an open end of a flexible bag, suction means for extracting air from said vacuum chamber, and sealing means for closing said flexible bag along a line beyond the vacuum chamber. The packing device (2) is housed inside the structure of the refrigerator (1) when it is not being used, and is slidably extractable for its use.
