Abstract (en)

The element (1) has an element body (2) formed from hardened building material and including a connecting line system (3) that is accessible via contact sections (4, 10). The connecting line system is formed by a funnel-shaped hollow region in a mounting device (12) and is surrounded by the building material. The contact sections are arranged in a region of a contact area (13) and/or a front side surface (11) of the element body. A longitudinal extension of the element body is in the range of 3 to 10 meters, and a height of the element body is in the range of 2.5 to 5 meters.

Abstract (de)

Die Erfindung betrifft ein Hochbauteil (1), insbesondere ein Wandelement, umfassend einen Bauteilkörper (2), der zumindest abschnittsweise aus einem ausgehärteten Baumaterial gebildet ist und eine Montagevorrichtung (12) aufweist, wobei der Bauteilkörper (2) ein Verbindungsleitungssystem (3) aufweist, das über einen Kontaktabschnitt (4,10) zugänglich ist.
