Abstract (en)
[origin: EP2169155A2] The lock (10) has an actuating element connected with a control device over which an electrical locking device (26) is provided in an unlocking position. An additional latch (20) is provided in the electrical locking device that is formed as an electrical opener (24), where the opener is attached to the latch. The opener is integrated completely into a door frame. The electrical locking device is supplied with current when placed in a locking position.
