Abstract (en)
[origin: EP2169158A1] Non-reusable anti-theft device for displaying eyeglasses comprising a main body (1), provided with an opening (2) for the arrangement thereof on display bars and with locking means (means for locking) (3), and means for connection (connection means) to at least one pair of eyeglasses. The device is characterized in that the locking means (3) for at least one pair of eyeglasses by means of specific and separate connection means, are produced in one piece with the main body (1) of the anti-theft device. The connection means clamp the eyeglasses and are thus irreversibly constrained to the device through the locking means (3).
