Abstract (en)

[origin: EP2169167A1] The adjusting device has two fittings inserted into each other, and are adjusted into each other by the adjusting screw (13). The fitting is fastened at a rod end of a rod (5), which holds at a distance of a carriage (3b). Another fitting is combined or connected with the carriage facing the rod end. An independent claim is included for a method for adjusting exact distance between two carriages of parallel stopping slide bracket of a slide blade.
