Abstract (en)
[origin: WO2009009914A1] The invention relates to a plunger-filter beverage preparation device of the French press coffee maker variety, incorporating a glass vessel (10). In order to prevent glass splinters from flying about in an uncontrolled manner in the event of a breakage of the glass, the glass vessel is surrounded by a retainer (2). Said retainer (2) consists of a bottom section (21) with a lower ring (26), an upper ring (22), and a narrow-mesh (24) extending between them. The retainer preferably expands in diameter from top to bottom.
