Abstract (en)
[origin: WO2009007411A2] The present invention relates to the use of an active substance that promotes the inhibition of AGE formation, for the preparation of a composition for preventing and/or combating the decrease in elastic and plastic properties of tissues, and in particular of the skin, for inhibiting AGE formation, or for preventing and/or combating protein glycation at the cutaneous level. The invention also relates to a method of screening for such active substances.
