Abstract (en)

[origin: WO2009012771A1] The invention relates to a viewing window (10) for an optical sensor and/or detection system in a vehicle, wherein at least one viewing field (11) of the optical system is defined within the viewing window. A window-heating device (15) encircles the viewing field while the viewing field itself is designed to be free from integrated elements or surface-mounted elements.
