Abstract (en)

[origin: WO2009003830A1] The present invention relates to a device and to a method for intervening in a steering system (1) having an active steering device (4), wherein a control device (10) determines, on the basis of received signals, in particular sensor signals, that a steering intervention should be carried out and the control device (10) directs an actuator (9; 8, 12) to apply a holding moment to a component of the steering system between the active steering device (4) and a steering wheel (2), in particular to a steering column (3).
