Abstract (en)

[origin: WO2009003982A1] A structure for boating structural supports is disclosed, which structure includes a plurality of support sections (6, 7) preferably made of aluminium alloy, each of which includes a cavity (2) and connecting edges (3), which may be mechanically assembled according to different configurations by means of connecting brackets (15-17, 19). The aluminium alloy employed may preferably be of the EN 6060 T5 type, suitable for nautical use.
