Abstract (en)

[origin: WO2009010022A1] On a securing device (100) for the transport of one or more containers (101), such as straining ring barrels or canisters, a secure, tight connection between the container (101) and pallet on the one hand, and between a plurality of containers (101) on the other hand, is achieved in that at least one fastening strut (110) is provided, which can be detachably anchored on the container (101) and comprises at least in some regions a support (111) for a tightening strap (120), the support being closed on two sides.
