Abstract (en)
[origin: WO2009004270A2] The invention relates to a ring (10) to be provided about a valve body (21) of an aerosol dispensing valve (20) mounted via a securing member (50) such as a crimped cap, on a tank containing a product to be dispensed, wherein said ring (10) includes at least one inner portion (11, 11) interacting with said valve body (21), and an outer portion (15), said ring (10) being made of a substantially rigid single piece, and said outer portion (15) being adapted for sealed interaction by material deformation with a portion of the tank (1) upon the assembly of the securing member (50) on the tank (1).
