Abstract (en)
[origin: WO2009016173A1] The present invention relates to a washer/dryer (1) that can operate at low energy, fast drying and hygienic drying modes by maintaining different levels of pressure and temperature decreases of the refrigerant fluid between the condenser (4) and the evaporator (3) by means of using a valve (7) and at least two throttle elements (8, 108) between the condenser (4) and the evaporator (3).
