Abstract (en)

[origin: WO2009001114A2] A conservatory roof has a system for attachment of window blinds built in for retrofitting of the window blinds. The attachment means will not be visible, so as not to affect the appearance of the conservatory roof when window blinds are not fitted. In particular mounting blocks (26) for supporting brackets (34) or support rails for window blinds will be installed during erection of a conservatory roof to be used when the window blinds are to be fitted.
